In this brand new publication, *The Law of Slip & Fall in South Carolina*, Daniel Denton has taken his 40 years of experience and created a valuable tool for all attorneys so that they may effectively investigate, evaluate, and litigate slip-and-fall and other personal injury cases. This book provides comprehensive analysis of South Carolina premises liability law applicable to slip-and-fall litigation, along with other areas of law typically involved in such cases. It should always be within reach when evaluating the factual and legal issues in your case, or when drafting legal memoranda and pretrial briefs.

Denton supplements the black-letter law with relevant appellate opinions, plus 13 case notes" straight from cases he has litigated. These notes are included under the related case law discussion to illustrate how the legal principles studied apply to real-life cases. Throughout the book are 11 "practice tips," including some checklists that can be used to evaluate the strengths and weaknesses of a slip-and-fall case. With sections on duties, foreseeability, standards of care, immunities and limitations on recovery, comparative negligence and assumption of risk, along with a table of 185 cases for easy reference, this book also serves as a primer for personal injury law in general.

The Law of Slip & Fall in South Carolina covers:

The classification of different types of visitors;
The elements of a slip-and-fall case and who has the burden of proof;
The duties owed to invitees;
Latent dangers and open-and-obvious dangers;
Nondelegable duties;
Storekeepers' duties to patrons;
Notice of hazards – actual and constructive;
The rules applicable to landlords and tenants;
Standards of care from common law, industry standards, contract, and statutes;
Immunities and limitations on recovery;
Comparative negligence and assumption of risk;
Case summaries categorized into specific hazards, including parking lots, sidewalks, wet floors, and unlevelled surfaces.

Included with your purchase, is a **CD with all the book's appendices**, which includes:

List of resources describing publications for slip-and-fall practice and procedure, general treatises and law review articles covering substantive legal issues, and aids for case development and litigation;
Summaries of the most relevant governmental codes, regulations, and industry standards related to slip and falls;
Checklist of slip-and-fall comparative fault factors;
Eighteen sample forms, including complaints and an answer; discovery documents, such as interrogatories and requests for production; trial documents and memoranda of law; and sample experts' reports illustrating expert analysis and opinions in slip-and-fall cases.
